

# Do you have a central warehouse structure for Europe leading to service fulfillment challenges?

You decided to optimize your warehouse structure and switch from a decentralized to a central warehouse for Europe to reduce your inventory costs?

You are now having difficulties concerning the fulfillment of your customer service and maintenance contracts within the given timeframe due to the big distances? Direct deliveries are not fast enough and too expensive? Non-fulfillment leads to penalties in case of downtimes of the wind turbines?

## Your needs

- Same day or express delivery of functional spare parts from a central warehouse to the onshore wind parks throughout Europe as well as fast return of defective parts for repair.
- Large extended network coverage to serve all wind power plants.
- Proven reliable and on time service.
- Customized and flexible transport solutions.
- Around the clock availability for ad-hoc emergency bookings besides the regular time critical shipments.

## Your solution

-  **Speed:** Dedicated transportation of each single shipment and fastest handling and transit times at all airports.
-  **Network:** 500 destinations reached with 25 airline partners all over Europe.
-  **Reliability:** High loading priority & physical monitoring on the apron.
-  **Flexibility:** Several transport options: airport-airport, door-door, customs clearance.
-  **Availability:** 24/7 availability of our Customer Service team, proactive status updates and active tracking of each shipment.
