

Your dependable, fast and competitive transport service from Southeast Asia to Europe

Southeast Asia is the center of many agglomeration areas of semiconductor and electronics producer delivering their complex goods to Europe. Forwarding between these continents is a task of great responsibility.

Are your customers faced with unexpected occurrences like production downtimes and urgently needed spare parts? Do your manufacturing semiconductor customers have to deal with extreme volatility in demand which results in capacity utilization problems? Do your customers rely on optimal logistic workflows?

Your solution

1. Handover of your consolidated shipments at the airport (SIN, PVG, PEK) 2 hours prior to departure
2. Export customs clearance
3. Flight to Frankfurt (FRA)
4. Fast handling and breakdown in FRA
5. Import customs clearance
6. Forwarding to several final destinations in Europe the same day including delivery

Your advantages

-  **Flexibility:** Several transport options: airport-airport, door-door, customs clearance. Longer production times due to latest pick-up in SIN, PVG, PEK. Earlier production start at consignee in Europe due to the shortened delivery time.
-  **Speed:** Shortest handling times due to direct apron access of the time:matters Courier Terminal in Frankfurt and a super-fast breakdown. Fastest connections to over 100 stations all over Europe.
-  **Reliability:** Highest loading priority.
-  **Availability:** 24/7 bookable via our Customer Service in Europe and Asia.

Shipment example from Singapore to Dublin within 22 hours
